Summary

My name is Maria and I'm a web developer.

I work in web programming more than 10 years. I have 1 year experience as PHP-developer, 3 years experience in Java-development as employee and 7 years experience of web development in my own business. At the beginning of 2022 I've decided to change my career and try myself as frontend developer.

Skills

- I have experience with HTML, CSS/SCSS, JavaScript. Now I'm studying VueJS and TypeScript.
- I have experience in creating responsive layouts.

- I know how to create website based on a design layout.
- I like to work in a team but also I can work on my own.
- I'm very disciplined and self-organized.
- I am friendly and know how to communicate with people.
- I'm ready to solve complex tasks.
- I don't know everything but I know how to find information.

Tools

Experience

2014-2022 Self-employed

Wheelko - boardgames shop

In the fall of 2014 I opened a board games shop in Kirov. The store has been successfully operating for a little over 7 years and in January 2022 I closed it. During this time I performed a huge range of duties: I was a shop assistant, engaged in hiring staff, led social networks, selected assortment, was engaged in marketing, etc.

Besides I developed and supported a website for my shop. I created a full-fledged online store with choice of delivery method and online payment for orders. Also part of the site was a CRM system, developed by me for the needs of the store.

Using technologies: Java, OpenCms, HTML, CSS, JSP, JavaScript, jQuery, Spring Roo, PostgreSQL

2011 - 2014 Full stack developer

ITDT Ltd. itdt.ru

When I worked for ITDT my responsibilities included reworking with the company's existing projects (web applications, desktop applications).

The project in which creation I took part from scratch is the website of the Museum of Contemporary Art erarta.com. The website was developed based on OpenCms using Spring Roo. In 2014 I quit from ITDT and became an entrepreneur. In my independent job I used skills and experience gained while working in this company.

Using technologies: [Java](#), [OpenCms](#), [HTML](#), [CSS](#), [JSP](#), [JavaScript](#), [jQuery](#), [Spring Roo](#), [PostgreSQL](#)

2010 - 2011 Web developer

Software center pbprog.ru

I started to work in Software center between the 4th and 5th year of study at the university. During the work I created a company website on the 1C-Bitrix platform. My responsibilities included developing the site structure, setting up the necessary modules, forms, adding content to the site and customizing existing 1C-Bitrix modules.
